

Fund Objective and Strategy

Investment Objective

The Fund aims to provide security of capital, daily liquidity and a return that is similar to Euro money markets.

Investment Policy

The Fund will invest in a diversified portfolio of short-term securities, instruments and obligations. These instruments will be short-term fixed or floating-rate securities that mature in 397 days or less. They will be issued by companies, governments and government-related entities and either listed or traded on a Recognised Market. The Fund's investments will, at the time of purchase, have a credit rating of least A-1 or P-1 (or its equivalent) from a recognised credit rating agency, such as Standard & Poor's or Moody's. The Fund can invest in a range of short-term securities, instruments and obligations such as- certificates of deposit; medium term, variable and floating rate notes; commercial paper; bankers acceptances; government bonds, corporate bonds, treasury bills and Eurobonds; asset backed securities and reverse repurchase agreements. The Fund's liquidity is daily – meaning investors can redeem their investment on any business day. The Fund is classified as a Low Volatility NAV Money Market Fund under the European Union Money Market Fund Regulations. The Fund's primary currency exposure is to Euro. See the Prospectus for a full description of the investment objectives and derivative usage.

Risk Disclosure

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk. □
- The Fund's objective may not be achieved in adverse market conditions. During times of very low interest rates, the interest received by the Fund could be less than the costs of operating the Fund.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the Fund's potential risks can be found in the Key Investor Information Document and Prospectus.
- UCITS HAVE NO GUARANTEED RETURN AND PAST PERFORMANCE DOES NOT GUARANTEE THE FUTURE ONES.

Since Inception to 16th March 2020 the Benchmark was 1 Week EUR LIBID. From 16th March 2020 the benchmark is Euro Short-Term Rate (€STR). □

¹The "AAAm", "Aaa-mf" and "AAAmmf" money market fund ratings are historical and reflect the superior quality of the Fund's investments, sound liquidity management, and strong operations and trading support. Periodic reviews are conducted to ensure a secure operations environment. The ratings do not eliminate the risks associated with investing in the Fund.

²The Weighted Average Life (WAL) of the fund is the average time to maturity calculated using the final legal maturity of all instruments, including floating rate notes. Thus, where the fund holds no floating rate instruments WAM and WAL will be the same.

³The Weighted Average Maturity (WAM) of the fund is the average number of days to maturity calculated using the next coupon fixing date of floating rate notes, and the final legal maturity of all other instruments. The maximum WAM is 60 days.
